Professional Summary

B.Tech CSE (AI/ML) graduate with hands-on experience in full-stack web development using Django REST Framework and React.js. Built and deployed production-ready applications with JWT authentication, REST APIs, and database integration. Skilled in backend systems, API development, and data analysis using Python and Pandas. Seeking backend developer or full-stack developer opportunities.

Technical Skills

- **Languages:** Python, JavaScript
- **Backend:** Django, Django REST Framework (DRF), REST APIs, CRUD Operations
- **Frontend:** React.js, HTML, CSS, JavaScript
- **Databases:** MySQL, PostgreSQL, SQLite
- **Data:** Pandas, NumPy, Matplotlib
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook
- **Core Concepts:** OOPS, API Integration, Database Design, JWT Authentication

Professional Experience

Python Developer Intern

QSpiders, Gurugram

- Developed 3+ full-stack applications using Django and React with REST API integration
- Improved documentation and knowledge sharing across team projects

Projects

BioLogist E-commerce Platform (Full Stack) — Live

Django, Django REST Framework, React, MySQL

- Developed a full-stack e-commerce platform with product, cart, and order management
- Designed relational database schema for efficient data handling
- Developed REST APIs for backend functionality
- Integrated frontend with backend using API calls
- Implemented authentication and session handling

GigFlow – Smart Leads Dashboard — Live

React.js, Django REST Framework, JWT, SQLite, Railway, Vercel

- Built and deployed a full-stack lead management dashboard with authentication
- Implemented JWT-based Login and Registration using Django REST Framework
- Developed protected CRUD APIs for lead management
- Integrated React frontend with Django backend using Axios
- Deployed frontend on Vercel and backend on Railway

E-commerce Data Analysis (Python) — GitHub

Python, Pandas, Matplotlib

- Analyzed large-scale e-commerce dataset using Pandas
- Performed data cleaning, merging, and transformation
- Extracted monthly revenue trends and business insights
- Identified top-performing products based on revenue
- Visualized insights using charts

Education

B.Tech in Computer Science Engineering (AI/ML)
DPG Institute of Technology & Management, Gurugram
CGPA: 7.3

2021 – 2025

Certifications

- Python Developer Training – QSpiders
- Cybersecurity Training – ICT Academy (Honeywell Sponsored)
- Power BI Training – Web Jyoti
- AI/ML Specialization – Udemy (In Progress)
