

Priyanshu Negi

Python Developer — Django Developer — Backend Developer

Delhi, India

+91 7428432234 — negips11april@gmail.com

LinkedIn — GitHub — Portfolio

Professional Summary

B.Tech Computer Science Engineering (AI/ML) graduate with hands-on experience in Python, Django, Django REST Framework (DRF), PostgreSQL, MySQL, and REST API development. Built and deployed full-stack web applications with authentication, database integration, and cloud deployment. Strong understanding of backend development, database design, object-oriented programming, and API architecture. Seeking opportunities as a Python Developer, Django Developer, or Backend Engineer.

Technical Skills

Languages: Python, JavaScript, SQL

Backend: Django, Django REST Framework (DRF), REST APIs, JWT Authentication, CRUD Operations

Frontend: React.js, HTML5, CSS3, JavaScript

Databases: PostgreSQL, MySQL, SQLite

Data Analysis: Pandas, NumPy, Matplotlib

Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook

Core Concepts: OOP, DBMS, Data Structures Algorithms, API Design, Authentication Authorization

Experience

Python Developer Intern

QSpiders, Gurugram

- Developed and maintained full-stack web applications using Django and React.js.
- Built REST APIs for CRUD operations and backend functionality.
- Worked with MySQL and SQLite databases for application data management.
- Collaborated on debugging, testing, and deployment activities.
- Improved documentation and knowledge sharing across development projects.
- Used Git and GitHub for version control and collaborative development.

Projects

BioLogist E-commerce Platform (Live)

Django, Django REST Framework, React.js, MySQL

Live Demo — GitHub

- Developed a full-stack e-commerce platform with product, cart, order, and user management functionality.
- Designed relational database schemas for efficient data storage and retrieval.
- Built RESTful APIs using Django REST Framework.
- Implemented user authentication, authorization, and session management.
- Integrated React frontend with Django backend through API communication.
- Deployed the application in a production environment.

GigFlow – Smart Leads Dashboard

React.js, Django REST Framework, JWT, SQLite, Railway, Vercel

GitHub

- Built and deployed a lead management dashboard with secure JWT-based authentication.
- Developed protected REST APIs for lead creation, retrieval, updating, and deletion.
- Implemented login, registration, and authorization using Django REST Framework.
- Integrated React frontend with Django backend using Axios.
- Applied API security and authentication best practices.
- Deployed frontend on Vercel and backend on Railway.

E-commerce Data Analysis Project

Python, Pandas, Matplotlib

GitHub

- Analyzed large-scale e-commerce datasets using Python and Pandas.
- Performed data cleaning, transformation, and exploratory data analysis.
- Extracted monthly revenue trends and actionable business insights.
- Identified top-performing products based on sales and revenue metrics.
- Visualized insights using Matplotlib.

Education

B.Tech in Computer Science Engineering (AI/ML)

DPG Institute of Technology & Management, Gurugram

2021 – 2025

CGPA: 7.3

Relevant Coursework

Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Machine Learning

Certifications

- Python Developer Training – QSpiders
- Cybersecurity Training – ICT Academy (Honeywell Sponsored)
- Power BI Training – Web Jyoti
- AI/ML Specialization – Udemy (In Progress)
